

Tutorial on Military Investigations

17 October 2016, Reykjavik, Iceland

In conjunction with ISASI Annual Seminar 18-20 October 2016

Objectives of Tutorial

This tutorial aims to have another gathering of international Military Accident Investigators to share knowledge on their respective capabilities, experiences, processes and procedures with a view to the development of future relationships and common practices. It follows the inaugural meeting of the European Military Air Safety Investigators Forum which took place April 2013, the two Military Air Safety Investigation Tutorials held during ISASI 2013 and ISASI 2015, and the Military Aviation Safety Workshop April 2016 in Albuquerque (USA) which addressed "Sharing Safety Lessons to Preserve Military Readiness". These forums/tutorials drew growing number of military investigators from across Europe, Australia, North America and Asia seeking to share their safety lessons.

The other goal of linking this tutorial to the 47th ISASI seminar is to benefit from the experience gained by the civil counterparts over the years. Participants to the tutorial are encouraged to register for the ISASI Seminar that will continue on 18, 19 and 20 October 2016 in Reykjavik, Iceland.

The main outputs of the presentations and discussions of this workshop will also be presented during the ISASI plenary session.

Contributions to Tutorial

If you are interested in contributing to this tutorial, please send a short abstract to bish.bishop306@mod.uk and to james.w.roberts3@boeing.com. The format of the presentations is flexible (no formal papers requested) in order to build an interactive programme on this specific topic.
